

I understand that Sinclair Broadcasting is going to force their stations to air an anti-Kerry documentary days in these last days before a critical and close election. I would like to point out that this is exactly the problem with one group owning a lot of stations. This is a very dangerous situation and a direct threat to our democracy. Our airwaves belong to all of us and are not to be tampered with by a few large corporations who own much more than they should and use their monopoly power to push their own political agenda.

These folks at Sinclair have an obligation by law to serve the our public interest. What they are planning to do is NOT good for our democracy. We would like to have the programing on our local radio stations controlled by folks like us who live in our area and understand what is happening here.

Can you move right now to stop this current bullying and control from afar? WE would like to have more say in the process when you go to give this corporation broadcast rights again. Sincerely, Gary Titus
